

Luling, Texas: 8/28/08 – People near the town of Luling were jolted awake when a 36-inch natural gas line exploded, sending flames as high as 400 feet in the air. “We were lucky that this rupture happened in an area where it’s very rural,” said Caldwell County Sheriff Daniel Law. “That same line could’ve ruptured anywhere along that track and affected a lot more people.”

ANGEL Services...

The view from ANGEL Services

“ANGEL Services found serious leaks we missed with our regular patrols. It’s been a great business decision to do this—one of the best things we’ve run into, technology-wise, in a number of years.”

— Jeff Cullison, Northern Natural Gas

ANGEL Services will find it.

ANGEL SERVICES TAKES YOU ABOVE AND BEYOND.

ITT’s ANGEL Services efficiently detects, measures, and locates pipeline leaks that walking crews, visual patrols, and SCADA controls are missing. ANGEL Services can leak-survey up to 1,000 miles a day, while delivering 100 times the ROW coverage of conventional methods. By using ANGEL Services, you’ll find emissions that would normally be missed.

Every leak in your system represents a risk. Even a small leak can compromise efficiency and safety. If your system has a natural gas leak, ANGEL Services will find it.

Your new Best Practice Take safety to a new level by protecting your pipelines, employees, communities, shareholders, and the environment with ANGEL Services. It’s a business opportunity you can’t afford to miss.
